

SUMMARY

Full Stack AI Engineer with 2+ years of experience building AI-powered applications, backend APIs, and data-driven systems, with hands-on experience in healthcare and medical imaging. Skilled in backend engineering, computer vision, data processing, production workflows, and taking projects from prototype to deployment.

SKILLS

- **Backend & API Engineering:** FastAPI, Django, Node.js, Express.js, REST APIs, microservices, authentication, payment workflows, third-party integrations
- **AI, Computer Vision & LLMs:** PyTorch, LangChain, vector databases, deep learning, image segmentation, model fine-tuning, AI pipelines, RAG, GenAI
- **Data & Reporting Systems:** Pandas, NumPy, CSV processing, data cleaning, data validation, automated reporting, clinical data validation
- **Databases & Storage:** PostgreSQL, MongoDB, Supabase, SQL, schema design, relational and document-based data modeling
- **Frontend & Mobile:** React.js, Next.js, React Native, JavaScript, TypeScript, Tailwind CSS, Bootstrap, jQuery
- **Production & DevOps:** Docker, Kubernetes, Linux, Git, Bitbucket, AWS, OVH VPS, deployment workflows, debugging, refactoring
- **Healthcare Software:** Medical imaging workflows, cardiac MRI processing, structured medical reports, healthcare data quality control

EXPERIENCE

Womia, R&D Engineer, Tunisia *Internship to Contract to Full-time* Jul 2024 – Present

- Built and deployed end-to-end medical imaging pipelines for cardiac MRI analysis, covering data ingestion, segmentation, post-processing, validation, and structured report generation.
- Fine-tuned SAM2-based computer vision models with PyTorch for cardiac MRI segmentation workflows and automated medical image analysis tasks.
- Developed production-ready REST APIs with FastAPI to connect AI inference, reporting workflows, internal tools, and downstream medical software components.
- Built and integrated a Stripe-based payment module with checkout workflows, payment handling, SendGrid email notifications, and backend service integration.
- Deployed backend services using Docker, Kubernetes, OVH VPS, and AWS infrastructure for production and release environments.
- Integrated CardioInspect reporting into the ArtFun+ pipeline and automated structured clinical report generation from processed cardiac MRI data.
- Refactored legacy reporting workflows, improved system stability, and supported technical and clinical validation of AI outputs and generated reports.

Technologies: Python, PyTorch, SAM2, FastAPI, PostgreSQL, Docker, Kubernetes, Stripe, SendGrid, OVH VPS, AWS, Pandas, NumPy, REST APIs, Computer Vision, Medical Imaging

SMART WMN, Full Stack Developer, Tunisia Aug 2022 – Jun 2024

- Developed and maintained front-end features for XQual, a test management platform used to manage quality assurance workflows.
- Built dynamic and reusable UI components with React.js, JavaScript, jQuery, and Bootstrap to improve platform usability.
- Implemented a Node.js and Express.js proxy service to support local development, testing, and integration workflows.
- Collaborated in an Agile development environment, contributing to bug fixing, feature delivery, and code maintenance.

Technologies: React.js, JavaScript, jQuery, Node.js, Express.js, Bootstrap, Git

Smart Team Group, Full Stack Developer Intern, Tunisia Feb 2022 – Jul 2022

- Developed an interactive data import module for business applications, supporting validation and workflow management.
- Integrated heterogeneous data sources and implemented data quality handling for import processes.
- Built UI components using JavaScript spreadsheet tools, including TreeGrid, to improve data review and editing.
- Supported backend development with Node.js, Express.js, Docker, and Git-based workflows.

Technologies: React.js, Node.js, Express.js, Docker, Git, TreeGrid

RIATICA, Mobile Developer Intern, Tunisia Jul 2021 – Aug 2021

- Developed a mobile application using React Native with backend services built on Node.js and Firebase.
- Implemented authentication and data handling using JWT, MongoDB, and Firebase services.

Technologies: React Native, Node.js, Firebase, MongoDB, JWT

EDUCATION

Engineering Degree in Computer Science and Telecommunications 2022 – 2025
ISITCOM, Sousse, Tunisia

Bachelor Degree in Web Development and Multimedia 2019 – 2022
ISET, Sidi Bouzid, Tunisia

LANGUAGES

English: Fluent — French: Professional
